NEW PRODUCT UPDATE

To compliment and expand our existing product range we now stock a variety of Mifare, HID and EM access cards and readers. Sourced directly from our extensive network of suppliers in the Far East this catalogue is designed to provide you with details of the type of product that we can now supply you with. The Mifare range consists of 1k and 4k cards along with a range of fobs, wristbands and readers, the HID range comprises cards (which can be printed and programmed) and readers and the EM range incorporates cards, fobs and readers. The catalogue is not an extensive list of everything that we can provide as we are continually updating the range, if a product is not listed it doesn't mean that we cannot supply it. If you have any enquiries or questions about any of the product please contact us.

- + Next day delivery on all stock items for orders received by 4:00pm
 - + 95% stock availability
 - + High quality product range
 - + Friendly efficient service
