

BFT-STOPPY-B-700

ELECTROMECHANICAL AUTOMATIC BOLLARD WITH LED CROWN

700mm x 200mm electromechanical automatic bollard complete with LED light crown

FEATURES

The Stoppy B 200/700 bollard is the perfect solution for traffic management and security across a wide range of environments. The discretely concealed bollards provide non-intrusive yet extensive protection.

Available in both 115/500mm (55kg) or 200/700mm (105kg) height sizes, the BFT Stoppy B Bollards come with rear reflective strips for increased visibility during darkness. Bollard control can be aggregated through the use of the [PERSEO CBE](#) dedicated control panel which is capable of controlling up to four security bollards at a time. (Control panel not included see perseo CBE).
