

DAITEM-SC100AU

MAINS POWERED CORDLESS HANDSET AND BASE STATION

This wireless audio handset features an LCD screen which provides the user with simple to understand instruction and notifications. It can control the operation of electric locks, gates and barriers, garage doors and lighting.

FEATURES

The handset comes with lithium-ion battery which is rechargeable on the mains powered base. It has a working range of up to 400 metres, but this is dependent on obstacles between the handset and controller that can cause interference. Up to four handsets can be connected in the same building with intercom facility. This handset is portable and can be easily carried around the house using the belt clip fitted. Once fully charged it can maintain full operation for up to 15 days.
