

DAITEM-SC902AU

WIRELESS AUDIO INTERCOM DOOR KIT WITH PROX & KEYPAD

The Daitem Wireless audio Intercom system allows the user to welcome and filter visitors, listen in to background sounds, and operate a number of automation systems from the home, such as electric gate openers, garage door openers, lighting systems and electric latches and locks.

FEATURES

- The latch and/or automatic gate can be controlled from the call point using the proxi-tag.
- Full duplex digital communication
- Up to 4 indoor handset units per call point/controller.
- Inter-handset communication
- The status of entrances and lighting can be viewed on the handset screen at any time.
- The handset can be used in hands-free or hand-held mode
