FAAC-104471

FAAC 412 LH R1 SWING GATE OPERATOR 220V

FEATURES

- For residential swing gates with maximum gate leaf up to 1.8m
- The 412 actuator is non-reversing, so it is self locking in open and closed positions
- Quick and easy to install with no need for expensive modifications to the existing load bearing structure
- Use of electro-mechanical technology makes the FAAC 412 ideal for light duty applications
- Anti-crushing protection is ensured by an electronic device installed on the FAAC control board that directly controls the operator torque
- In case of emergency the release key makes it possible to operate the gate manually
- The 412 cuts down maintenance requirements considerably
- Reliability is assured under all atmospheric conditions and in an outdoor temperature range of -20°C to +55°C
