FAAC-108759

FAAC 750 JACK W/O HOUSING 100DEG OPENING

FEATURES

- Drive units are available at an opening angle of 100° and 180° and pumps with or without hydraulic locking
- The exclusive hydraulic device ensures maximum anti-crushing protection, featuring two highly sensitive by-pass valves
- In case of an emergency a key-protected release device makes it possible to operate the gate manually
- The CBAC version has hydraulic locking to hold the gates in a fixed open or closed position
- Reliability is assured under all atmospheric conditions and at extreme temperatures in the range – 40°C to +55°C
- The hydraulic device requires very little maintenance and is low on electrical power consumption Consists of a sturdy, compact, underground drive unit and a hydraulic pump unit mounted above ground inside the property All components are integrated in a hydraulic circuit providing continuous lubrication and cooling
