FAAC-108760

180 DEGREE OPENING JACK FOR 750 SB

The 750 CP for swing gates, utilises a load bearing foundation box, suitable for gates up to 3.5m leaf length with single-leaf max weight of 800kg

FEATURES

- Drive units are available at an opening angle of 100° and 180° and pumps with or without hydraulic locking
- The exclusive hydraulic device ensures maximum anti-crushing protection, featuring two highly sensitive by-pass valves
- In case of an emergency a key-protected release device makes it possible to operate the gate manually
- The CBAC version has hydraulic locking to hold the gates in a fixed open or closed position
- Reliability is assured under all atmospheric conditions and at extreme temperatures in the range –40°C to +55°C
- The hydraulic device requires very little maintenance and is low on electrical power consumption
- Consists of a sturdy, compact, underground drive unit and a hydraulic pump unit mounted above ground inside the property
- All components are integrated in a hydraulic circuit providing continuous lubrication and cooling
