E124 CONTROL BOARD

The E124 control board is considered to be one of the highest performance electronic control units for swing gates currently available on the market. Compatible with all FAAC 24V swing gate systems; the E124 will also control other brands. It’s a highly flexible control board with a huge range of variable parameters for swing gate installations.

FEATURES

- Swing gate control board for 24V operators
- Additional programming features accessible via a device with USB port
- The control board has an ultra sense function for obstacle detection with hydraulic operators
- Hold closed function to pulse leaves closed every 1 to 48 hours
- A cycle counter allows consistent and regular servicing by showing the total number of cycles or alternatively, the counter can be set to request assistance after a set number of cycles
- The 32 bit processor platform has sufficient capacity for today and the future
- Software developments can be uploaded to the board as and when they become available via a USB connector
- It can be programmed via push buttons and advanced programming can be undertaken via PC (software is available free of charge)
