NICE-OVIEW

NICE UNIT FOR CONTROL, PROGRAMMING OF DEVICES WITH BUS T4

FEATURES

- Unit for control, programming and diagnostics for devices equipped with BUS T4 connection, on site or remotely via GPRS
- Connected directly to the compatible control unit via a BUS T4 cable (supplied)
- By connecting permanently to a control unit or group of control units via BUS T4, a network can be created for local or remote centralised management
- Simple programming mode with intuitive menus valid for each product, with no need to consult the specific instructions
- O-View powers up and automatically recognises all devices on the network as soon as it is connected, displaying only the specific parameters of the device on which to intervene
- In the case of several devices on the network the BUS T4 address is identifiable by means of a text label personalised as required, enabling rapid recognition of the associated device
- It is also possible (with integrated backup battery) to program delivery of commands at a set time, for example to automate opening and closing of complex industrial and commercial systems or for the creation of “scenarios”
- A practical wall-mounted support supplied
- Two password- protected levels (for the user and the installer) O-View is your portable office, and can be connected just when programming or for maintenance, or can be installed permanently on site to exploit all the benefits of local or remote centralised management
