WIRELESS/WBAND/2FOPTICAL 2 CH TX 2 X AA 3.6V BATTERY

The optical safety edge wireless transmitter can be used in conjunction with the Pilot control panels with built in wireless band. (Not MN series.) Used in conjunction with the Pilot and 3 Phase range of control panels with built in or plug in receiver there is no need to wire in limits to enable/disable the optical sensors as this is controlled by the panel itself.

FEATURES

- Used in conjunction with the Pilot and 3 Phase range of control panels with built in or plug in receiver there is no need to wire in limits to enable/disable the optical sensors as this is controlled by the panel itself.
- The unit is easily programmed and ensures EN-13849-2 is met.
- Batteries (2 x Lithium 3.6V) Supplied
