OVS-01GT VEHICLE DETECTION SENSOR FOR GATE CONTROL

The ViiK OVS-01GT is a dual technology vehicle detection sensor designed to be used in conjunction with an automatic gate, barrier or industrial door. Mounted above the ground, it will detect a vehicle arriving at a speed of 2 to 20km/h and then stopping. Vehicle detection is ensured by a combination of microwave and ultrasonic wave. In many cases, it can replace a ground loop sensor or video based sensors.

FEATURES

- Above ground vehicle sensor - no civil engineering work required
- Combined FMCW (Microwave) and ultrasonic technology
- Vehicle presence and activation sensor for gate, barrier, and industrial door
- Detecting vehicles at a speed from 2 to 20km/h
